You press your fingerprint on the back of your **Revv Card** to activate it. If you leave the card somewhere, it will call you & tell you where it is. If you get 80 feet away from your **Revv Card**, the card will go inactive, so no one else can use it. When you retrieve the card, just press your fingerprint onto the reader on the back of the card to activate the card again. It will only take **your** fingerprint.
